

Hose Storage Units

Eliminate clutter and enhance safety

Proper hose storage is critical to maintain the working life of hose assemblies. Stainless Space™ Hose Storage Units are the perfect tools for organizing your sanitary hose assemblies. When used properly, HSUs ensure each hose is stored in accordance with the manufacturer's recommendations.

All Hose storage units are electropolished stainless steel. Stationary units feature horizontal pegs for storing sanitary gaskets, clamps and adapters. The HSU-12, HSU-16, HSU-24 and HSU-32 are designed for specific hose diameters. The arced design of the HSU-100 accommodates a multitude of hose assembly types and sizes. For locations with minimal wall space, the SW series is ideal.

Stainless Space Hose Storage Units keep hoses organized and off the floor, consistent with cGMP requirements. The reduced clutter and improved organization contribute to a safer, cleaner work environment and extended hose assembly life. Stainless Space Hose Storage Units are the perfect solution to your hose organization needs.

Features and Benefits

- Compact designs for use in any clean environment.
- Extends hose working life and ensures 100% drainage.
- Eliminates clutter and enhances safety.
- Hoses, clamps, gaskets and adapters conveniently stored in one location.
- Conforms with FDA and 3A regulations for hose storage.
- Electropolished stainless steel construction.
- Available in stationary or swinging units.
